Let me know what kind of K.P. you are building, Russian is the most popular of course. Also what year you are cloning so I can get the details correct for your specific receiver.

Available selector markings – Soviet (Tula and Izzy style available), Bulgarian, Polish, E. German, Yugoslavian, Hungarian, Romanian. *Ask about others if you need something different*

Receiver Features - All receivers include features that are correct for each model and year of model - stamped selector markings, milled selector detents, correct size, number, and placement of spot welds, custom serial numbers, correct style center support rivet head and right side "I" dimple. Receivers are made from 4130 and fully heat treated to RC36. All receivers will ship in the white with a fine sandblast texture. To prevent corrosion receivers must be kept oiled until final finish is applied.

Manufacturer's information location - standard location under trigger guard, serial number is always in front of magwell. Manufacturer's info can also be placed up front of magwell. I will always leave room to drill the latch pin hole on every model just in case you want to build a folder.

Available options

All options available on any model of receiver

NFA SBR markings - \$10 per line, 12 characters per line including spaces with a 4 line max. SBR markings will be located under trigger guard and manufacturer's info moved up front of the magwell.

Drill Rivet Holes – \$20 per trunnion. I will drill the rivet holes using your trunnions to insure perfect rivet hole location. Ship me your trunnions, trunnions will be returned with receiver, no extra return shipping cost. Folding stock receivers come standard with rear trunnion rivet holes predrilled.
Trunnions must be demilled before sending them to me. If you need me to demill your trunnions I can, email me for a quote.

I can also make any of these receivers in a generic state, without selector markings or detents. These receivers will still include a custom serial number and all the other features of my premium receivers. Email me what you are interested in and I will quote you a price.
